Work Experience

MaxQ Accelerator August 2016

An organization that provides space start-ups with funding and connections to industry professionals.

- Software Developer Created an API that returns satellite data in JSON and parsed HDF files into a Postgres Database.

The Fountain of Love and Life July – August 2015

An organization that produced film and music for the Ontario Fairchild television station with an audience of more than 1 million

- Plugin Developer Designed and developed a PHP plugin to transform excel files into WordPress posts, enabling a better management of all company announcement files.

Toronto Hacker Club September 2015 - Present

A youth-lead organization that organizes hackathons and workshops for over 300 student participants in the Greater Toronto Area.

- Director of External Affairs Corresponded with a variety of organizations to source potential sponsors and assisted participants at events with technical issues.

Projects

FinTech – Finding the Asian Carp

Structured an IBM Bluemix database to arithmetically predict the spawning of Asian Carp in the great lakes using water temperature and flow data.

Syncurio – Facial Recognition Access Control

Utilized machine learning to recognize and store familiar faces in IBM Bluemix. Implemented a Node server to notify landlords of unrecognized faces from a home security camera.

Achievements

Hack the North Winner – September 2016

Won against 1000 competitors at Canada's largest hackathon in Waterloo.

Fishackathon International Finalist – April 2016

Represented Toronto in the 2016 International Fishackathon hosted by the US Department of State.

Personal Goals

Long term: To establish a career in data analytics

Short term: To acquire a position within the tech industry where I can utilize my ability to adapt and collaborate to develop innovative applications.

Education

Pierre Elliot Trudeau HS

ICS3U Grade 11 Computer Science
