Work Experience

Data Scientist at Flipp July – Aug. 2017

- Developed an industry-grade résumé parser to normalize text and extract features.
- Cooperated with the Talent, Marketing, and Data Engineering team to gather domain knowledge and business direction.
- Generated N-grams, a bag of words, and a hand-picked dictionary as a feature space for modelling.
- Utilized high-dimensional visualization tools (TSNE, SVD, and FDA) to identify troublesome words.
- Trained multiple models (SVM, Naïve Bayes, and random forest) to classify successful from non-successful candidates.
- Tuned the hyperparameters of an SVM model to further improve its accuracy.

Software Developer at MaxQ Accelerator Aug. 2016

- Created an API that returns satellite data in JSON and parsed HDF files into a Postgres Database.

Extracurriculars

Data Science Team at the STEM Fellowship Mar. 2017 – Present

A national non-profit that underscores data science and scholarly writing education.

- Prepared datasets for Kaggle-like competitions and organized academic reporting challenges.

Corporate Director at Toronto Hacker Club Sept. 2015 – Oct. 2017

A youth-lead organization that organizes hackathons and workshops for over 400 student participants in the Greater Toronto Area.

- Corresponded with a variety of organizations to source potential sponsors and assisted participants at events with technical issues.

Achievements

STEM Fellowship Big Data Challenge Winner Feb. 2017

Placed first with an abstract that proposed solutions to combat forest fires (journal.stemfellowship.org/toc/sfj/3/1).

Hack the North Winner Sept. 2017

Won Canada's largest hackathon and used satellite data to improve Ontario's agricultural security.

Second Place at MHacks 9 Mar. 2017

Created a text editor that archives a presenter's audio as notes are taken.

Summary

A data scientist and software developer with a passion to tell stories and advocate for social change. Capable of combining experiences with competitive programming and software development to engineer excellent features from datasets.

Education

University of Waterloo

Honours Software Engineering Co-op
(Expected) 2018 – 2023

Pierre Elliott Trudeau HS

ICS4U Grade 12 Computer Science
(Expected) 2014 – 2018

Skills

Pandas, Sklearn, XGboost
Matplotlib, Seaborn
NodeJS, React, Angular
C++, Java
AWS, Databricks
Postgres, MySQL
HTML, CSS, LESS, SASS, PHP
