Work Experience

MaxQ Accelerator August 2016

An organization that provides space start-ups with funding and connections to industry professionals.

- Software Developer Created an API that returns satellite data in JSON and parsed HDF files into a Postgres Database.

The Fountain of Love and Life July – August 2015

An organization that produced film and music for the Ontario Fairchild television station with an audience of more than 1 million

- Plugin Developer Designed and developed a PHP plugin to transform excel files into WordPress posts, enabling a better management of all company announcement files.

Toronto Hacker Club September 2015 - Present

A youth-lead organization that organizes hackathons and workshops for over 300 student participants in the Greater Toronto Area.

- Director of External Affairs Corresponded with a variety of organizations to source potential sponsors and assisted participants at events with technical issues.

Projects

FinTech – Finding the Asian Carp

Structured an IBM Bluemix database to arithmetically predicted the spawning of the Asian Carp in the great lakes using water temperature and flow data.

Syncurio – Facial Recognition Access Control

Utilized machine learning to recognize and store familiar faces in IBM Bluemix. Implemented a Node server to notify landlords of unrecognized faces from a home security camera.

Achievements

Hack the North Finalist – September 2016

Placed top 12 at Canada's largest hackathon in Waterloo.

Fishackathon International Finalist – April 2016

Represented Toronto in the 2016 International Fishackathon hosted by the US Department of State.

Personal Goals

Long term: To work towards a career in Software Development

Short term: To acquire a position within the tech industry where I can utilize my ability to adapt and collaborate with others to develop innovative applications.

Education

Pierre Elliot Trudeau HS

ICS3U Grade 11 Computer Science

ICS4U Grade 12 Computer Science

Skills

JavaScript, C++, Java, HTML, Python, SQL, PHP

NodeJS, Linux, Android, AngularJS, Cordova, WordPress
